Task 7.1P: Learning Plan Check-in

Reflecting My Progress

Target Grade: Distinction

Reason for Target Grade: While I initially aimed for a High Distinction, upcoming deadlines for several modules are close together, and I'm juggling nearly 6 modules at once. To prioritize my workload and achieve strong results across all my courses, I'm adjusting my target grade to Distinction.

Learning Plan Updates

I'll be creating a detailed weekly schedule allocating time for each module, prioritizing tasks based on importance and deadlines. This ensures dedicated study and work periods alongside personal time for a healthy balance.

I'll utilize active learning techniques like note-taking, summarizing key points, getting along with group discussion with peers and self-testing to solidify understanding. Regularly revisiting the material through review sessions will enhance information retention. I won't hesitate to seek clarification from instructors or classmates on complex topics.

Staying informed about course announcements and updates is crucial. Additionally, I'll leverage available resources like online forums, peer study groups, or tutors for support. Participating in discussions and group projects will enrich my learning experience.

Focusing on in-depth understanding rather than rote memorization will be key. I'll aim to practice applying concepts to real-world scenarios.

Self-reflection and Adjustments

Regularly evaluating my progress towards my Distinction goal is important. I'll identify areas for improvement and adjust my learning strategies accordingly. Reflecting on my strengths and acknowledging my achievements will boost motivation and keep me focused.

Conclusion

By adjusting my target grade to Distinction and implementing these revised learning strategies, I aim to manage my workload effectively, prioritize tasks efficiently, and achieve strong academic performance throughout the trimester. I'm committed to dedicating necessary effort and utilizing available resources to secure success in this module.
